PROFESSIONAL SUMMARY

Computing Science student and two-time startup founder with a track record of taking full ownership of ambiguous, high-stakes problems, from raising capital to building an audience to running day-to-day operations, with no team to hand work off to. Uses AI tools daily and deliberately, not as a novelty, to research faster, make better decisions, and get more done independently. Comfortable learning new domains quickly, communicating clearly with technical and non-technical audiences, and holding myself accountable for accuracy when no one else is checking.

CORE SKILLS

Founder-Level Ownership and Execution | AI-Assisted Research and Workflows (ChatGPT, Claude) | Data-Backed Decision Making | Process Design and Documentation | Cross-Functional Communication | Investor and Stakeholder Relationship Management | Figma UI/UX Design | Fast Learning Curve | Independent Problem Solving

KEY ACHIEVEMENTS

- Raised \$13,000 in pre-seed funding as a first-time founder, pitching and defending the business case directly to investors
- Onboarded 10 founding pilot brands from zero, sourced entirely through direct outreach and founder interviews
- Grew an audience of 1,000+ LinkedIn followers from zero through original, data-cited content
- Sustained 2+ years of unsupervised, error-free inventory reconciliation in a high-volume retail environment
- Selected for the competitive Venture Kamloops startup accelerator program

EXPERIENCE

Founder

Rezlv (in stealth) | Remote | 2025 to Present

- Own end-to-end technical and business decision-making for an early-stage platform, from product direction through go-to-market, with no team to hand work off to
- Onboarded 10 founding pilot brands from a standing start, personally identifying, qualifying, and validating each one through direct interviews with ecommerce founders and CX leads
- Researched and fact-checked original, data-backed content on operational knowledge loss in ecommerce, citing third-party industry data (Panopto, IDC) accurately before publishing
- Grew a 1,000+ follower LinkedIn audience through consistent, credible, build-in-public content, generating real inbound interest ahead of launch
- Use AI tools daily to accelerate research, decision-making, and documentation, and maintain detailed records across every workstream so rationale stays traceable as the business evolves

Founder & CEO

Proofly | Kamloops, British Columbia, Canada | May 2025 to Oct 2025

- Directed the end-to-end product lifecycle of a tech-enabled property evaluation platform, translating a real market problem (trust gaps in the rental market) into a user-centric solution from concept through a funded launch
- Pitched to investors directly and secured \$13,000 in pre-seed funding, building and defending data-backed business cases under direct investor questioning
- Selected for the competitive Venture Kamloops accelerator program; used structured mentorship to refine the business model, validate product-market fit, and structure the long-term roadmap
- Built and cultivated strategic partnerships with industry stakeholders while directly managing cross-functional teams to ensure seamless delivery from concept to launch

Night Stocker

Costco Wholesale | Kamloops/Vancouver, British Columbia, Canada | March 2023 to Present

- Reconcile inventory data nightly across a high volume of SKUs, using handheld scanners and inventory management systems to cross-check physical counts against system records
- Identify and resolve data discrepancies between physical counts and recorded inventory, preventing downstream reporting errors
- Sustained 2+ years of consistent accuracy in a fast-paced, deadline-driven, unsupervised role

LEADERSHIP AND COMMUNITY INVOLVEMENT

- Worked closely with TRU Generator (Thompson Rivers University's startup and entrepreneurship support program), TRU Business Club, and the Kamloops Business Incubator throughout both startup ventures
- Member of Enactus, a student-led entrepreneurial and social-impact organization
- Designed complete UI/UX flows and interactive prototypes in Figma for two mobile app projects (Snapcheck, Carveal), translating product requirements into shippable interface designs

EDUCATION

Bachelor of Computing Science

Thompson Rivers University, Kamloops, British Columbia, Canada (in progress)

WORK AUTHORIZATION

Canadian study permit holder. Open to remote work worldwide, part-time or full-time depending on role location and study-permit hour limits.
